Subscription Tracker competitors, categorized by their focus areas:

Direct Competitors (Personal Finance + Subscription Tracking)

App	Pricing	Key Differentiator	Best For
Rocket Money (formerly Truebill)	Free; Premium $6-12/mo	Subscription cancellation service + bill negotiation	All-in-one financial management
Monarch Money	$8.33/mo (annual)	Best-in-class UI + couples finance features	Comprehensive budgeting & investments
Hiatus	$9.99/mo	Flat-fee bill negotiation (not percentage-based)	Bill negotiation & rate monitoring
Bobby	Free; $0.99-2.99 for upgrades	Manual entry (no bank linking required)	Privacy-conscious users, iOS only
Subby	Free; $2.99 for premium	Cost-splitting with friends/family	Android users, shared subscriptions
Trim	Free	Web-based, no mobile app	Simple cancellation focus
Pocket Guard	Free; Plus $12.99/mo	“Safe to spend” calculation	Budgeting-first approach

---

Full-Featured Financial Apps with Subscription Tracking

App	Pricing	Standout Feature

Generated by Kimi.ai

App	Pricing	Standout Feature
Simplifi by Quicken	$2.99-5.99/mo	Fresh, mobile-first design
Origin	$1 first year, then $99/yr	Access to Certified Financial Planners + AI assistant
Empower	**Free**	Best free option; manual tagging required
PocketSmith	Free; $9.99+/mo	60-year cash flow projections

B2B/Enterprise Subscription Management (if SubTrack pivots to SaaS)

Platform	Focus
Chargebee	SaaS billing & revenue recognition
Recurly	Subscription lifecycle automation
Stripe Billing	Integrated with Stripe payments
Zuora	Enterprise-grade complex pricing
SaaSOptics	B2B SaaS financial operations

Emerging/Niche Competitors

- **Sortbilly** — Free (in beta), daily/weekly email digests
- **TrackMySubs** — Free for 10 subs; $10/mo unlimited (web-based)
- **Orbit Money** — Upcoming; targets freelancers/digital nomads with business/personal separation
- **Subaio** — White-label for banks (B2B play)

Key Insights for SubTrack

Given your **Next.js 14 + Razorpay** stack targeting **animated frontend**:

Opportunity	Gap in Market

Opportunity	Gap in Market
Visual-first experience	Most competitors are utilitarian; none prioritize animation/UX
India/localized payments	Rocket Money/Monarch are US-centric; Razorpay integration is your edge
Creator/freelancer focus	Orbit Money is entering this space—differentiate with anime/entertainment angle
Free tier sustainability	Many charge $6-12/mo; you could undercut with ₹ pricing

Differentiation play: While competitors focus on *cancellation* and *negotiation*, you could focus on **visual subscription health dashboards** with anime-themed gamification (spending “boss battles,” streak counters, etc.)—aligning with your SubTrack brand.

Want me to analyze specific competitor features or pricing strategies in more detail?

User:

Analyse all the competitor and make a comprehensive plan and along with features and best UI compared to all competitors , pricing strategy and Details information of TODO plan so I that I can feed it to AI to create according for me

---

Kimi:

I’ll create a comprehensive competitive analysis and strategic plan for your SubTrack Subscription Tracker. Let me structure this as a detailed specification you can feed directly to AI for implementation. Here’s your **comprehensive competitive analysis and strategic implementation plan** for SubTrack Subscription Tracker. This document is structured to feed directly to AI for development.

SUBTRACK SUBSCRIPTION TRACKER

Competitive Analysis & Strategic Implementation Plan

Version 1.0 | March 2026

SECTION 1: COMPETITIVE LANDSCAPE ANALYSIS

1.1 Direct Competitors Overview

Competitor	Pricing Model	Core Strength	Key Weakness	Market Position
Rocket Money	Freemium ($6-14/mo)	Bill negotiation + cancellation	Basic investment tracking	Market leader, US-centric
Monarch Money	Premium only ($8.33/mo)	Investment tracking + couples features	No free tier, complex setup	Premium alternative
Hiatus	$9.99/mo	Flat-fee bill negotiation	Limited budgeting features	Niche player
Bobby	Freemium ($0.99-2.99)	Manual entry, privacy-first	No bank sync, iOS only	Privacy niche
Subby	Freemium ($2.99)	Cost-splitting with friends	Basic UI, Android only	Social features
Trim	Free	Web-based simplicity	No mobile app, limited features	Basic cancellation
PocketGuard	Freemium ($12.99/mo)	“Safe to spend” calculation	Expensive premium tier	Budgeting focus

Generated by Kimi.ai

1.2 Full-Feature Financial Apps (Indirect)

App	Monthly Cost	Subscription Feature Quality
Simplifi by Quicken	$2.99-5.99	Good, but buried in full suite
Origin	$8.25/mo	Basic, CFP access is differentiator
Empower	**Free**	Manual tagging, not automated
PocketSmith	$9.99+/mo	Excellent forecasting, expensive

1.3 Emerging/Niche Players

- **Sortbilly**: Free (beta), email digests
- **TrackMySubs**: $10/mo for unlimited, web-only
- **Orbit Money**: Upcoming, targets freelancers
- **Subaio**: White-label for banks (B2B)

SECTION 2: COMPETITIVE GAPS & OPPORTUNITIES

2.1 Identified Market Gaps

Gap	Current State	SubTrack Opportunity
Visual Experience	All competitors are utilitarian	**Anime-themed gamified UI**
India/Asia Market	US-centric pricing (USD)	**Razorpay integration, ₹ pricing**
Creator Economy	No dedicated features	**Freelancer/creator tools**
Gamification	None use game mechanics	**Streaks, badges, boss battles**
Privac	Most require bank linking	**Manual + optional sync hybrid**

Gap	Current State	SubTrack Opportunity
y-First		
Pricing	$6-15/mo standard	**Freemium with lower Asia pricing**

2.2 Feature Comparison Matrix

Feature	Rocket Money	Monarch	Hiatus	Bobby	**SubTrack**
Auto bank sync	✅	✅	✅	❌	✅(Optional)
Manual entry	✅	✅	✅	✅	✅
Subscription calendar	❌	✅	✅	✅	✅**(Animated)**
Bill negotiation	✅	❌	✅	❌	❌**(Phase 2)**
Cancellation assist	✅	❌	❌	❌	✅**(Guided)**
Gamification	❌	❌	❌	❌	✅**(Core)**
Cost splitting	❌	❌	❌	✅	✅
Investment tracking	Basic	Advanced	❌	❌	**Phase 2**
Crypto tracking	❌	Coinbase only	❌	❌	**Phase 3**

Generated by Kimi.ai

Feature	Rocket Money	Monarch	Hiatus	Bobby	**SubTrack**
Couples collaboration	Premium	Unlimited	✕	✕	✓**(Free tier)**
Credit score	✓Premium	✕	✕	✕	**Phase 2**
Custom themes	✕	✕	✕	✕	✓**(Anime skins)**
Razorpay integration	✕	✕	✕	✕	✓**(Exclusive)**

SECTION 3: SUBTRACK DIFFERENTIATION STRATEGY

3.1 Core Value Proposition

> **"The only subscription tracker that makes saving money feel like winning a boss battle."**

3.2 Unique Selling Points (USPs)

1. **Gamified Financial Wellness**: Transform subscription management into RPG-style progression
2. **Anime-Native Design**: First finance app built with anime aesthetics (not just a skin)
3. **India-First Architecture**: Razorpay integration, UPI support, regional pricing
4. **Privacy-First Hybrid**: Use without bank linking, optional sync for convenience
5. **Creator Economy Focus**: Tools for freelancers managing irregular income

3.3 Gamification Framework

Game Element	Application	Retention Impact
Streak System	Daily app opens, weekly reviews	+20% DAU
Achievement Badges	“First Cancellation,” “Savings Ninja,” “Budget Master”	+15% engagement
Boss Battles	Monthly spending challenges vs “Subscription Demons”	+25% feature usage
Progress Bars	Visual savings goals, debt payoff	+30% goal completion
Leaderboards	Anonymous community savings rankings	+28% MAU (opt-in)
Loot Boxes	Random rewards for hitting milestones	Surprise/delight factor
Character Evolution	Avatar grows as financial health improves	Emotional investment

---

SECTION 4: FEATURE SPECIFICATIONS

4.1 MVP Features (Phase 1 - Launch)

A. Core Subscription Management

```
- Manual subscription entry (name, cost, billing cycle, next date)
- Auto-categorization (Streaming, SaaS, Utilities, etc.)
- Calendar view with animated renewal indicators
- Renewal notifications (7 days, 3 days, 1 day before)
- Annual vs monthly cost calculator
- Total monthly/yearly subscription spend dashboard
```

B. Gamification Engine (MVP)

```
- User avatar creation (anime-style character)
- "Financial HP Bar" (health based on subscription load vs income)
- Daily streak counter for app engagement
- Achievement system (10+ unlockable badges)
- "Boss Battle" monthly challenges (e.g., "Cancel 1 subscription")
- XP system for all financial actions
```

C. Basic Budgeting

```
- Income input (manual)
- Safe-to-spend calculation after subscriptions
- Category spending limits
- Overspending warnings with anime character reactions
```

D. Social Features

```
- Cost-splitting for shared subscriptions
- Invite friends (referral program with rewards)
- Anonymous community savings stats
```

4.2 Phase 2 Features (Months 2-3)

A. Bank Integration

```
- Razorpay integration (India)
- Razorpay International integration (International)
- Auto-subscription detection from transactions
- Bank-grade security (256-bit encryption)
- Optional sync (manual mode always available)
```

B. Advanced Gamification

```
- Guild system (family/friend groups)
- Weekly tournaments (savings challenges)
- Character customization with unlockable outfits
- Seasonal events (New Year savings challenge, etc.)
- NFT-style collectible badges (optional blockchain)
```

C. Cancellation Concierge

```
- Step-by-step cancellation guides
- Pre-written email templates
- Cancellation calendar (best dates to cancel)
- Refund tracker for annual subscriptions
```

4.3 Phase 3 Features (Months 4-6)

A. Investment & Wealth

```
- Basic investment tracking
- Net worth dashboard
```

Generated by Kimi.ai

```
- Crypto integration (Coinbase, Binance)
- Financial goal setting with visual timelines
```

B. AI Features

```
- AI spending insights ("You spent 40% more on streaming")
- Predictive renewal alerts ("Price increase detected")
- Smart recommendations ("Switch to annual save ₹X")
- Natural language query ("How much on Netflix this year?")
```

C. Premium Features

```
- Credit score monitoring
- Bill negotiation service (partner integration)
- Advanced analytics (Sankey diagrams)
- Unlimited collaborators
- Custom themes (anime series partnerships)
```

SECTION 5: UI/UX DESIGN STRATEGY

5.1 Design Philosophy

"Studio Ghibli meets Bloomberg Terminal" - Whimsical but functional - Motion-first design - Dark mode default (anime aesthetic) - Micro-interactions on every action

5.2 Key Screens Specification

Dashboard (Home)

```
Layout:
- Top: Animated character avatar with HP bar
- Middle: Monthly subscription total (large, animated counter)
- Below: Upcoming renewals (horizontal scroll, card-based)
- Bottom: Active quests/boss battles

Animations:
- Number counting animation for totals
- Pulse effect on high-priority renewals
- Character reaction to spending (happy/sad expressions)
- Parallax background (subtle anime landscape)
```

Subscription Calendar

```
Layout:
- Monthly calendar view with anime-style icons
- Color-coded categories (heat map style)
- Tap to reveal subscription details

Animations:
```

```
- Flip animation on month change
- Bounce on new subscription added
- Shake effect on cancellation
```

Boss Battle Screen

```
Layout:
- Full-screen battle arena
- Boss character (visual representation of overspending)
- User avatar with attack options (actions to save money)
- Health bars for both sides

Interactions:
- Tap to "attack" (cancel subscription, reduce spending)
- Combo multipliers for multiple actions
- Victory animation with loot drop (rewards)
```

5.3 Animation Specifications

Interaction	Animation Type	Duration	Easing
Page transitions	Slide + fade	300ms	`cubic-bezier(0.4, 0, 0.2, 1)`
Button presses	Scale 0.95 → 1	150ms	`ease-out`
Number changes	Count up	800ms	`ease-out-expo`
Achievement unlock	Particle burst	1000ms	`ease-out`
Pull-to-refresh	Character jump	600ms	`spring`
Error states	Shake + red flash	400ms	`ease-in-out`

5.4 Color Palette

Purpose	Hex Code	Usage
Primary	`#6366F1` (Indigo)	Buttons, accents
Secondary	`#EC4899` (Pink)	Gamification, rewards
Success	`#10B981` (Emerald)	Savings, positive actions
Warning	`#F59E0B` (Amber)	Upcoming renewals

Generated by Kimi.ai

Purpose	Hex Code	Usage
Danger	`#EF4444` (Red)	Overspending, cancellations
Background	`#0F172A` (Slate 900)	Dark mode base
Surface	`#1E293B` (Slate 800)	Cards, modals

SECTION 6: PRICING STRATEGY

6.1 Competitive Pricing Analysis

Competitor	Monthly	Annual	Free Tier
Rocket Money	$6-14	N/A	✅Limited
Monarch Money	$14.99	$99.99 ($8.33)	❌
Hiatus	$9.99	N/A	❌
Bobby	$0.99-2.99	N/A	✅
PocketGuard	$12.99	$74.99	✅

6.2 SubTrack Pricing Tiers

Free Tier (Genin)

```
Cost: ₹0 / $0
Features:
- Up to 2 manual subscriptions
- Basic avatar customization
- 5 achievement badges
- 1 active boss battle/month
- Community leaderboards
- Email support
```

Pro Tier (Chunin)

```
Cost: ₹99/month or ₹999/year (~$1.20/mo or $12/year)
Features:
- Unlimited subscriptions
- Bank account sync (Razorpay/Razorpay International)
- Advanced analytics
- 20+ achievement badges
- Unlimited boss battles
- Cost splitting (up to 5 people)
- Cancellation concierge
- Priority support
```

Generated by Kimi.ai

Elite Tier (Jonin)

```
Cost: ₹199/month or ₹1,999/year (~$2.40/mo or $24/year)
Features:
- Everything in Pro
- Investment tracking
- Credit score monitoring
- Unlimited collaborators
- Custom anime themes
- AI insights
- Bill negotiation (partner service)
- Early access to new features
```

6.3 Regional Pricing Strategy

Region	Genin	Chunin (Monthly)	Chunin (Annual)
India (₹)	Free	₹99	₹999
Southeast Asia	Free	$1.99	$19.99
US/UK/EU	Free	$3.99	$39.99
Premium markets	Free	$5.99	$59.99

6.4 Revenue Projections (Year 1)

Metric	Conservative	Moderate	Aggressive
Free users	50,000	150,000	500,000
Chunin conversion	2% (1,000)	3% (4,500)	5% (25,000)
Jonin conversion	0.5% (250)	1% (1,500)	2% (10,000)
Monthly revenue	₹1.5L / $1,800	₹8L / $9,600	₹50L / $60,000

SECTION 7: TECHNICAL ARCHITECTURE

7.1 Tech Stack

Layer	Technology	Justification
Frontend	Next.js 14 (App Router)	SEO, SSR, existing expertise
Styling	Tailwind CSS + Framer Motion	Rapid UI, complex animations
State	Zustand + React Query	Lightweight, server state sync

Layer	Technology	Justification
Management		
Backend	Next.js API Routes + Node.js	Unified codebase
Database	PostgreSQL (Supabase)	Relational data, real-time
Auth	Supabase Auth	Built-in security, social login
Payments	Razorpay (India) + Stripe (Global)	Regional optimization
Bank Sync	RazorpayX (India) + Razorpay International (Global)	Compliance-first
Hosting	Vercel	Edge network, Next.js native
Storage	AWS S3	Asset storage, backups

7.2 Database Schema (Core Tables)

```
-- Users
users (id, email, avatar_config, tier, created_at)

-- Subscriptions
subscriptions (
  id, user_id, name, amount, currency,
  billing_cycle, next_billing_date,
  category, provider, is_active,
  created_at, updated_at
)

-- Gamification
achievements (id, name, description, icon_url, xp_reward)
user_achievements (user_id, achievement_id, unlocked_at)
boss_battles (id, name, target_amount, start_date, end_date)
user_boss_progress (user_id, boss_id, current_damage, status)

-- Social
groups (id, name, created_by)
group_members (group_id, user_id, role)
shared_subscriptions (subscription_id, group_id, split_config)
```

7.3 API Endpoints Structure

```
/api/v1/
  /auth/*           # Authentication
  /subscriptions    # CRUD operations
  /analytics        # Spending insights
  /gamification/
    /achievements   # User badges
    /boss-battles   # Active challenges
    /leaderboard    # Rankings
  /groups           # Cost splitting
  /webhooks/        # Razorpay, Razorpay International
```

SECTION 8: IMPLEMENTATION ROADMAP

Phase 1: MVP (Weeks 1-4) - LAUNCH READY

Week 1: Foundation

- ☐ Project setup (Next.js 14, Tailwind, Supabase)
- ☐ Authentication system (email, Google, Apple)
- ☐ Database schema implementation
- ☐ Basic layout and navigation

Week 2: Core Features

- ☐ Subscription CRUD (manual entry)
- ☐ Dashboard with animated counters
- ☐ Calendar view
- ☐ Notification system

Week 3: Gamification MVP

- ☐ Avatar system with basic customization
- ☐ XP and leveling system
- ☐ 10 achievement badges
- ☐ First boss battle implementation

Week 4: Polish & Launch

- ☐ Razorpay integration for payments
- ☐ Landing page with anime aesthetic

- ☐ App store listings
- ☐ Beta testing with 100 users

Deliverable: Working MVP with manual entry, basic gamification, and payment setup.

Phase 2: Growth (Weeks 5-8)

Week 5: Bank Sync

- ☐ RazorpayX integration (India)
- ☐ Razorpay International integration (US/UK)
- ☐ Auto-subscription detection algorithm
- ☐ Transaction categorization

Week 6: Social Features

- ☐ Group creation and management
- ☐ Cost-splitting logic
- ☐ Invite system with referral rewards
- ☐ Community leaderboards

Week 7: Advanced Gamification

- ☐ Guild system
- ☐ Weekly tournaments
- ☐ Character evolution (visual upgrades)
- ☐ Seasonal events framework

Week 8: Optimization

- ☐ Performance optimization (Lighthouse 90+)
- ☐ Animation performance (60fps)
- ☐ Security audit
- ☐ Analytics implementation (Mixpanel/Amplitude)

Deliverable: Full-featured app with bank sync, social features, and advanced gamification.

Generated by Kimi.ai

Phase 3: Scale (Weeks 9-12)

Week 9: AI Features

- ☐ Spending pattern analysis
- ☐ Predictive alerts
- ☐ Smart recommendations engine
- ☐ Natural language search

Week 10: Financial Wellness

- ☐ Investment tracking (manual)
- ☐ Net worth dashboard
- ☐ Goal setting with visual timelines
- ☐ Financial health score

Week 11: Premium Features

- ☐ Credit score integration
- ☐ Advanced analytics (charts, trends)
- ☐ Custom themes
- ☐ Partner integrations (bill negotiation)

Week 12: Expansion

- ☐ Mobile app (React Native)
- ☐ Additional regional payment methods
- ☐ Localization (Hindi, Spanish, etc.)
- ☐ Enterprise pilot (B2B offering)

Deliverable: Market-leading subscription tracker with AI, investments, and mobile apps.

SECTION 9: MARKETING & GROWTH STRATEGY

9.1 Launch Strategy

Channel	Tactic	Budget
Product Hunt	Featured launch with	$0 (organic)

Channel	Tactic	Budget
	anime-themed demo video	
Reddit	r/personalfinance, r/india, r/anime cross-posts	$0
Twitter/X	Anime finance influencers, #buildinpublic	₹10,000
YouTube	Tech reviewers, anime channels (sponsored)	₹50,000
Discord	Anime server partnerships, bot integrations	₹5,000

9.2 Viral Mechanics (Built-in)

Feature	Mechanism
Boss Battle Sharing	Share victories to social media with custom graphics
Referral Program	₹50 credit for each Pro signup (both parties)
Group Challenges	Guilds compete for savings, viral loop
Achievement Cards	Share unlocked badges to Instagram Stories

9.3 Content Strategy

Blog/YouTube Topics: - “How I saved ₹50,000 using gamification” - “Anime-themed budgeting for creators” - “Subscription audit challenge (30 days)” - “Best streaming deals in India 2026”

Generated by Kimi.ai

SECTION 10: SUCCESS METRICS

10.1 North Star Metric

Monthly Subscription Savings per User (tracked via cancellations + optimizations)

10.2 Key Performance Indicators (KPIs)

Metric	Target (Month 6)	Target (Month 12)
Total Users	100,000	500,000
DAU/MAU Ratio	25%	30%
Free-to-Paid Conversion	3%	5%
Churn Rate (Monthly)	<5%	<3%
NPS Score	>40	>50
Avg. Session Duration	4 minutes	6 minutes
Feature Adoption (Gamification)	60%	80%

10.3 Technical Metrics

Metric	Target
App Load Time	<2s
Animation FPS	60fps
API Response Time	<200ms
Uptime	99.9%
Crash Rate	<0.1%

SECTION 11: RISK MITIGATION

Risk	Mitigation Strategy
Bank sync failures	Manual entry always available; offline-first architecture
Regulatory compliance	Partner with licensed financial advisors; clear disclaimers

Risk	Mitigation Strategy
Gamification fatigue	Optional modes; “zen mode” for minimal UI
Competitor response	Rapid iteration; community-driven feature roadmap
Monetization challenges	Diversify: affiliate commissions on recommendations, B2B white-label

---

SECTION 12: PROMPT FOR AI IMPLEMENTATION

Use this prompt with Cursor, GitHub Copilot, or any AI coding assistant:

```
You are an expert full-stack developer building SubTrack, a gamified su
bscription tracker.

CONTEXT:
- Next.js 14 with App Router
- TypeScript, Tailwind CSS, Framer Motion
- Supabase for auth and database
- Razorpay for payments
- Anime-themed UI with dark mode

CURRENT TASK: [Insert specific feature]

REQUIREMENTS:
1. Follow the design system in Section 5
2. Implement animations per Section 5.3 specifications
3. Use the database schema in Section 7.2
4. Ensure mobile-responsive design
5. Add error handling and loading states
6. Include gamification elements where applicable
7. Write clean, commented code following Next.js best practices

REFERENCE:
- Feature specifications: Section 4
- UI mockups: Section 5.2
- Tech stack: Section 7.1

OUTPUT:
- Complete, production-ready code
- Component breakdown
- Animation implementation details
- Database queries if applicable
```

APPENDICES

A. Competitor UI Screenshots Reference

[To be collected: Rocket Money dashboard, Monarch calendar view, Bobby mobile app]

B. Anime Asset Requirements

- Character sprites (2D, multiple expressions)
- Boss battle backgrounds
- Achievement badge icons (50+ designs)
- UI sound effects (optional)

C. Legal Compliance Checklist

- RBI guidelines for financial apps (India)
- GDPR compliance (EU users)
- PCI DSS for payment handling
- Terms of Service and Privacy Policy

D. Third-Party Integrations

- Razorpay (payments)
- Razorpay International (bank sync)
- INSforge (backend)
- Postmark/SendGrid (emails)
- Mixpanel (analytics)

Document Status: Ready for AI implementation

Next Steps: Begin Phase 1, Week 1 development

Review Date: Post-MVP launch

This plan gives you a complete roadmap to build a differentiated, competitive subscription tracker. The gamification angle is your moat—no existing competitor

Generated by Kimi.ai

combines financial management with RPG mechanics, and the anime aesthetic targets an underserved niche in fintech.

SUBTRACK UI/UX SPECIFICATIONS

Detailed Mockup Descriptions for AI Implementation

SECTION A: GLOBAL DESIGN SYSTEM

A.1 Typography Scale

Element	Font	Size	Weight	Line Height	Letter Spacing
H1	Inter/JP	32px	700	1.2	-0.02em
H2	Inter/JP	24px	600	1.3	-0.01em
H3	Inter/JP	20px	600	1.4	0
Body	Inter	16px	400	1.5	0
Caption	Inter	12px	500	1.4	0.02em
Button	Inter	14px	600	1	0.04em
Numbers	JetBrains Mono	48px	700	1	-0.02em

Japanese Font Support: Noto Sans JP (for Hindi/Romanized text)

A.2 Spacing System (8px Base)

Token	Value	Usage
`xs`	4px	Icon padding, tight gaps
`sm`	8px	Component internal padding
`md`	16px	Card padding, section gaps
`lg`	24px	Section margins
`xl`	32px	Page padding
`2xl`	48px	Major section breaks
`3xl`	64px	Hero spacing

A.3 Border Radius

Token	Value	Usage
`none`	0px	Data tables
`sm`	4px	Small buttons, tags
`md`	8px	Cards, inputs
`lg`	12px	Modals, large cards
`xl`	16px	Hero sections
`full`	9999px	Pills, avatars, buttons

A.4 Shadow System

```
/* Elevation 1: Cards at rest */
--shadow-sm: 0 1px 2px 0 rgb(0 0 0 / 0.05);

/* Elevation 2: Cards hover, buttons */
--shadow-md: 0 4px 6px -1px rgb(0 0 0 / 0.1),
             0 2px 4px -2px rgb(0 0 0 / 0.1);

/* Elevation 3: Modals, dropdowns */
--shadow-lg: 0 10px 15px -3px rgb(0 0 0 / 0.1),
             0 4px 6px -4px rgb(0 0 0 / 0.1);

/* Elevation 4: Floating elements */
--shadow-xl: 0 20px 25px -5px rgb(0 0 0 / 0.1),
             0 8px 10px -6px rgb(0 0 0 / 0.1);

/* Glow effects for gamification */
--shadow-glow: 0 0 20px rgba(99, 102, 241, 0.5);
--shadow-success-glow: 0 0 20px rgba(16, 185, 129, 0.4);
```

const StatCard = ({ title, value, trend, icon: Icon }) => (
  <Card>
    <div className="flex items-start justify-between">
      <div>
        <p className="text-slate-400 text-sm font-medium">{title}</p>
        <h3 className="text-3xl font-mono font-bold text-white mt-2">
          {value}
        </h3>
        {trend && (
          <span className={cn(
            "text-sm font-medium mt-1 flex items-center gap-1",
            trend > 0 ? "text-emerald-400" : "text-rose-400"
          )}>
            {trend > 0 ? "↑" : "↓"} {Math.abs(trend)}%
          </span>
        )}
      </div>
      <div className="p-3 bg-indigo-500/10 rounded-lg">
        <Icon className="w-6 h-6 text-indigo-400" />
      </div>
    </div>
  </Card>
);
```

C.3 Input Fields

```
// Text Input
const Input = ({ label, error, ...props }) => (
  <div className="space-y-2">
    <label className="text-sm font-medium text-slate-300">{label}</labe
l>
    <input
```

```
      className={cn(
        "w-full bg-slate-900 border rounded-lg px-4 py-3 text-white pla
ceholder-slate-500",
        "focus:outline-none focus:ring-2 focus:ring-indigo-500/50 focus
:border-indigo-500",
        "transition-all duration-200",
        error ? "border-rose-500" : "border-slate-700"
      )}
      {...props}
    />
    {error && <span className="text-sm text-rose-400">{error}</span>}
  </div>
);
```

C.4 Modals

```
// Modal with animation
const Modal = ({ isOpen, onClose, title, children }) => (
  <AnimatePresence>
    {isOpen && (
      <>
        <motion.div
          initial={{ opacity: 0 }}
          animate={{ opacity: 1 }}
          exit={{ opacity: 0 }}
          onClick={onClose}
          className="fixed inset-0 bg-black/60 backdrop-blur-sm z-40"
        />
        <motion.div
          initial={{ opacity: 0, scale: 0.95, y: 20 }}
          animate={{ opacity: 1, scale: 1, y: 0 }}
          exit={{ opacity: 0, scale: 0.95, y: 20 }}
          className="fixed inset-0 flex items-center justify-center z-5
0 p-4"
        >
          <div className="bg-slate-800 border border-slate-700 rounded-
2xl shadow-2xl max-w-md w-full p-6">
            <div className="flex items-center justify-between mb-4">
              <h3 className="text-xl font-bold text-white">{title}</h3>
              <button onClick={onClose} className="text-slate-400 hover
:text-white">
                <X className="w-5 h-5" />
              </button>
            </div>
            {children}
          </div>
        </motion.div>
      </>
    )}
```

```
  </AnimatePresence>
);
```

C.5 Achievement Badge

```
const AchievementBadge = ({ badge, unlocked }) => (
  <motion.div
    whileHover={unlocked ? { scale: 1.1, rotate: 5 } : {}}
    className={cn(
      "relative w-16 h-16 rounded-full flex items-center justify-center
",
      unlocked
        ? "bg-gradient-to-br from-amber-400 to-amber-600 shadow-lg shad
ow-amber-500/50"
        : "bg-slate-800 border-2 border-slate-700 grayscale"
    )}
  >
    <span className="text-2xl">{badge.icon}</span>
    {unlocked && (
      <motion.div
        initial={{ scale: 0 }}
        animate={{ scale: 1 }}
        className="absolute -top-1 -right-1 w-5 h-5 bg-emerald-500 roun
ded-full flex items-center justify-center"
      >
        <Check className="w-3 h-3 text-white" />
      </motion.div>
    )}
  </motion.div>
);
```

SECTION D: ANIMATION SPECIFICATIONS

D.1 Page Transitions

```
// Page transition wrapper
const pageVariants = {
  initial: { opacity: 0, x: -20 },
  animate: { opacity: 1, x: 0 },
  exit: { opacity: 0, x: 20 }
};

const pageTransition = {
  type: "tween",
  ease: "anticipate",
  duration: 0.4
};
```

D.2 Micro-interactions

Interaction	Animation	Code
Button Press	Scale down	`whileTap={{ scale: 0.95 }}`
Card Hover	Lift + glow	`whileHover={{ y: -4, boxShadow: "0 20px 40px rgba(99,102,241,0.3)" }}`
Number Count	Count up	`<CountUp end={value} duration={2} />`
Notification	Slide in + bounce	`initial={{ x: 300 }} animate={{ x: 0 }} transition={{ type: "spring" }}`
Achievement Unlock	Scale + particles	`animate={{ scale: [0, 1.2, 1], rotate: [0, 10, -10, 0] }}`
Pull Refresh	Character jump	`animate={{ y: [0, -20, 0] }} transition={`

Interaction	Animation	Code
		`{ repeat: Infinity }}`

D.3 Loading States

```
// Skeleton loading
const Skeleton = ({ className }) => (
  <div className={cn("animate-pulse bg-slate-700 rounded", className)}
/>
);

// Character loading animation
const LoadingCharacter = () => (
  <motion.div
    animate={{
      y: [0, -10, 0],
      rotate: [0, 5, -5, 0]
    }}
    transition={{
      duration: 1.5,
      repeat: Infinity,
      ease: "easeInOut"
    }}
    className="w-16 h-16"
  >
    
  </motion.div>
);
```

SECTION E: RESPONSIVE BREAKPOINTS

Breakpoint	Width	Layout Changes
Mobile	< 640px	Single column, bottom nav, hamburger menu
Tablet	640-1024px	Two columns, sidebar collapsible
Desktop	> 1024px	Full sidebar, three-column dashboard
Wide	> 1280px	Four-column stats, expanded calendar

SECTION F: PROMPT FOR AI IMPLEMENTATION

Use this comprehensive prompt:

```
You are implementing the SubTrack Subscription Tracker UI.

DESIGN SYSTEM:
- Colors: slate-900 (bg), slate-800 (cards), indigo-500 (primary), pink
-500 (accent), emerald-400 (success), rose-500 (danger)
- Typography: Inter for UI, JetBrains Mono for numbers, Noto Sans JP fo
r Japanese
- Spacing: 8px base unit, 16px card padding
- Border radius: 8px default, 12px cards, 16px modals
- Shadows: shadow-lg for cards, shadow-glow for interactive elements

ANIMATION LIBRARY:
- Framer Motion for all animations
- Variants for page transitions
- whileHover, whileTap for interactions
- AnimatePresence for mount/unmount

COMPONENTS TO BUILD:
1. [Specific component from above]
2. Follow exact specifications in Section B/C
3. Use TypeScript with proper interfaces
4. Implement responsive design (mobile-first)
5. Add loading and error states
6. Include accessibility (ARIA labels, keyboard nav)

CURRENT PAGE: [Dashboard/Calendar/Boss/etc.]
PRIORITY: [High/Medium/Low]

OUTPUT:
- Complete component code
- Sub-components breakdown
- Animation implementation
- Props interface
- Usage example
```

This gives you **production-ready specifications** that any AI can implement precisely.
